

## COUNTY LOCAL LAWS

## 23-3 Definitions

**ON-SITE:** Water, Sewer and Storm Drain Systems.

A private water distribution, sanitary sewer or storm drain system of water mains, valves, fire hydrants, sewer pipes, manholes; catch basins, storm drain pipe, and their appurtenances, owned and maintained by a private interest to serve two or more buildings within the non-sub-divided interest of the owner, with final connections to a public water, sanitary sewer or storm drainage system.

**PLUMBING:** The definition section as set forth in Chapter 1 of the 1971 National Standard Plumbing Code is hereby adopted and incorporated by reference thereto as if fully set forth herein.

**GAS FITTING:**

**Applicability:**

This standard applies to the installation of nonindustrial type gas appliances and to the design, fabrication, installation and tests of nonindustrial piping systems for fuel gases such as natural gas, manufactured gas, undiluted liquefied petroleum gases, liquefied petroleum gas-air mixtures, or mixtures of any of these gases, as follows:

(a) Low pressure (not in excess of 1/2 pound per square inch or 14 inches water column) piping systems extending from the outlet of the meter set assembly, or the outlet of the service regulator when a meter is not provided, to the inlet connections of appliances.

(b) The installation of appliances supplied at pressures of 1/2 pound per square inch or less.

**Nonapplicability:**

This standard does not apply to:

(a) Gas piping systems for industrial installations at any pressure or any other gas piping system operating at pressures greater than 1/2 pound per square inch. Piping in such installations shall be installed in accordance with good practices.

(b) Gas equipment supplied through piping systems covered in 1.1.2(a), and

(c) Gas equipment designed and installed for specific manufacturing, production, processing and power
